
PRESS RELEASE

The success story continues / DESIGNA takes over Asytec

Kiel/Mainz, 12th November 2010. DESIGNA Verkehrsleittechnik GmbH has expanded its international presence by taking over Mainz-based ASYTEC GmbH, a manufacturer of parking management and access control systems. The take-over process was completed with the signing of the purchase agreement on 1st November 2010. The parties to the agreement decided not to reveal the exact amount of the purchase price.

This step incorporates ASYTEC in the DESIGNA Verkehrsleittechnik GmbH company as an additional subsidiary. DESIGNA will therefore benefit from the existing sales and service network in the ticket system, access control and video system areas of the company from Mainz. "The goal is to reinforce our position as one of the world's leading companies for fully automated parking systems. The takeover allows us to make use of the country-specific know-how of internationally operating ASYTEC in order to acquire new markets in South Africa and Asia", says Dr. Thomas Waibel, managing director of DESIGNA Verkehrsleittechnik GmbH.

The agreement allows all ASYTEC GmbH business activities to continue in the usual way. This includes both comprehensive management of existing ASYTEC customers by their usual contacts, and responsibility for all service and support work for the installed systems. One of Asytec's most important customers is the international airport in Frankfurt.

Further information:

DESIGNA transcends boundaries where it makes sense to do so.

Our clear, visionary standards have been helping DESIGNA to develop innovative products and services in the parking management sector for over 60 years. With around 6,000 installed systems and a variety of sales partners and subsidiaries in over 50 countries, this has made us one of the world's leading manufacturers of fully automated parking management systems. But today DESIGNA offers much more.

As the driving force for an entire sector, DESIGNA does not just come up with technological equipment and the software to match, but also something only very few can offer – innovative ideas.
